Using European quality and standards in a tropical environment and climate was achieved by using natural materials and fabrics with the highest quality and exceptional design. Every piece of furniture in Villa Beige was customized and imported from around the world, mainly from Italy and France.

The cream-color furniture and white marble floor provide a pleasing contrast to the brown ebony wood fittings.

Smoked mirrors, leather, velour and silk merge to match the shades of cream and earth tones, achieving a sense of balance and relaxation. The Villa Beige Interior team assembled a collection of fabrics from around the world, including „cord“ fabric from Korea, „snake skin“ from the USA, and „velour“ from France.

Located on a hillside on the southwest coast of the Thai island of Koh Samui, Villa Beige's contemporary, Mediterranean design is set within a spectacular, tropical natural environment. The rectilinear, white design of this beachfront estate stands out dramatically from the green of the palm trees.
